

I am in favor of eliminating the element 1 morse code test. I see no advantage in it to communicate voice, phone over any amateur band. Don't have to take the element 1 morse code test to communicate voice, phone on 6 or 2 meters for example, why do you need element 1 morse code to communicate voice, phone on 40 or 20 meters? Again eliminate the element 1 morse code test as a requirement. Thank you.
